SUMMARY

Angular Developer with 2+ years of experience building enterprise web applications using Angular 14–21, TypeScript, RxJS, and REST APIs. Experienced with Angular SSR, Reactive Forms, RBAC, JWT authentication, Route Guards, Angular Signals, and Standalone Components, with a consistent focus on application performance and maintainable architecture.

EXPERIENCE

Growhut Technologies

Jan 2026 – May 2026

Angular Developer | Remote

Built and maintained Angular SSR applications with reusable components and RxJS-based async data handling. Integrated REST APIs and worked cross-functionally with backend and QA teams to ship production features with cross-browser support.

Mindcrew Technology Pvt. Ltd.

Jan 2025 – Dec 2025

Angular Developer | Indore

Developed and maintained responsive Angular 14+ web applications using TypeScript, Reactive Forms, and REST API integration; improved page load performance by 25% through RxJS-based state optimization and lazy-loaded route architecture, collaborating closely with backend teams to deliver production-ready features.

Rivosoft Technologies

Mar 2024 – Dec 2024

Angular Developer | Remote

Built and maintained key modules of an Angular-based enterprise application, including an interactive admin dashboard, admin panel, and JWT-based authentication system. Implemented Route Guards and Interceptors to manage role-based access control across the admin panel. Improved application performance through AOT compilation, code-splitting, and lazy-loaded route architecture, ensuring fast load times across all modules.

SKILLS

- **Frontend:** Angular 16/17/20+, TypeScript, JavaScript, HTML5, CSS3, SCSS, JSON, Unit Testing, SPA (Single Page Application)
- **Architecture:** Lazy Loading, Route Guards, Custom Pipes, Interceptors, Reactive Forms, JWT, REST APIs, Dependency Injection, HttpClient, Angular Signals, Standalone Components, RxJS (Observables, Subjects, Operators: map, SwitchMap, filter)
- **UI Libraries and Tools:** Angular Material, Bootstrap, Ionic, Responsive Design, Pixel-Perfect UI, Git, Github
- **AI Tools:** Claude Code, Codex, Cursor IDE, Agentic Ai, WindSurf, Copilot

EDUCATION

Chameli Devi Group of Institutions

| 2020 – 2024

Bachelor of Technology – Computer Science | CGPA: 7.61

PROJECTS

Intervio — AI-Powered Mock Interview SaaS | [intervio.in](#)

- Worked on an AI-powered mock interview platform enabling real-time voice interviews and resume-based personalization, supporting 500+ developers across 1,000+ interview sessions.
- Integrated Gemini AI to generate structured performance reports with question-level scores, communication assessments, confidence ratings, and improvement suggestions. Architected the application using Standalone Components, lazy-loaded routes, Angular Signals, RxJS, and Route Guards to optimize performance.

Azakaw - AI Transaction Monitoring System

- Developed an enterprise-level AML and transaction-monitoring platform using Angular SSR for alert management, customer operations, compliance investigation, and reporting workflows.
- Built responsive UI modules, integrated REST APIs and AI-powered features, and optimized application performance for scalable and efficient banking operations. Reduced initial page load time by 30% through AOT compilation, code-splitting, and lazy-loaded modules.
